

Git/GitHub Workshop

Tuesday && Wednesday
6:15–8:15 PM
Dana 316

BRING YOUR
LAPTOPS

22 && 23 October

Open to CS, CSE, and MWD

SODA/CHIPS
PROVIDED

With almost 3/4ths of the revision market, Git is — by far — the most dominant revision control system in the tech market, and it has consistently grown since 2005. Trends indicate close to 100% of market share in 5 years. In other words, **learn it now!**

We'll discuss...

- What is GitHub?
- What is a repo(sitory)?
- Controlling files with Git
- Committing
- Pushing
- Pulling
- Branching
- Merging
- Cloning
- Forking
- What is a pull request?
- Retrieving files from different points in a timeline
- Chasing a bug
- Retrieving deleted files, even after emptying the trash!
- Piecemeal committing
- Semantic versioning
